Assembly Instructions
# Cardboard Bed

Important before assembly:

The making of this cardboard bed will require the use of a sharp tool such as a craft knife, it would be sensible to lay a protective sheet or cover to avoid scratches and damaging the floor or a table.

Health & Safety:

Please keep the sharp tools and small parts out of reach of children.
Always use the bed on a level, even surface.
DO NOT jump on the bed.

Please keep these instructions for future reference.
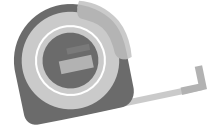

To make the cardboard bed, you will require:
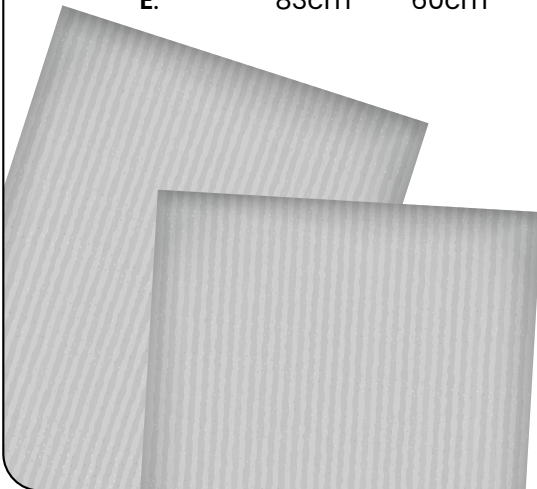

**Pencil**

Craft Knife

Ruler or a measuring tape

A **straight-edged piece of wood** to help fold the cardboard

Cardboard

Part	Side X	Side Y	Pieces
A:	45cm	50cm	4
B:	63cm	64cm	2
C:	63cm	66cm	1
D:	83cm	60cm	2
E:	83cm	60cm	2

Direction of grain lines in the card

Side Y

Side X

Please note: Side X should be parallel to the direction of the grain lines in the cardboard before cutting.
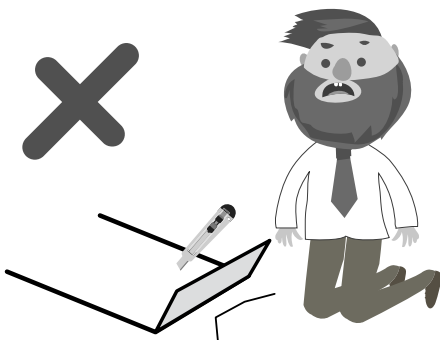

Lay a protective sheet or cover under the card to avoid scratches and damaging the floor or a table when using a knife or a sharp tool.

Cutting out components

Please note:

When cutting out, please ensure all the slots (usually on the edges and as shown here) are 0.5cm in width, or as thick as the card (unless otherwise stated).

0.5cm

↕ 0.5cm

↕ 0.5cm

The above lines are shown to indicate the direction of the grain in the cardboard. Please ensure when folding, these lines are in the opposite direction to the folds to allow more strength and support.

The dotted line indicates the fold line.
Use a piece of wood to press on the fold lines and carefully bend the card up. This is safer to do when the slots have not been cut.
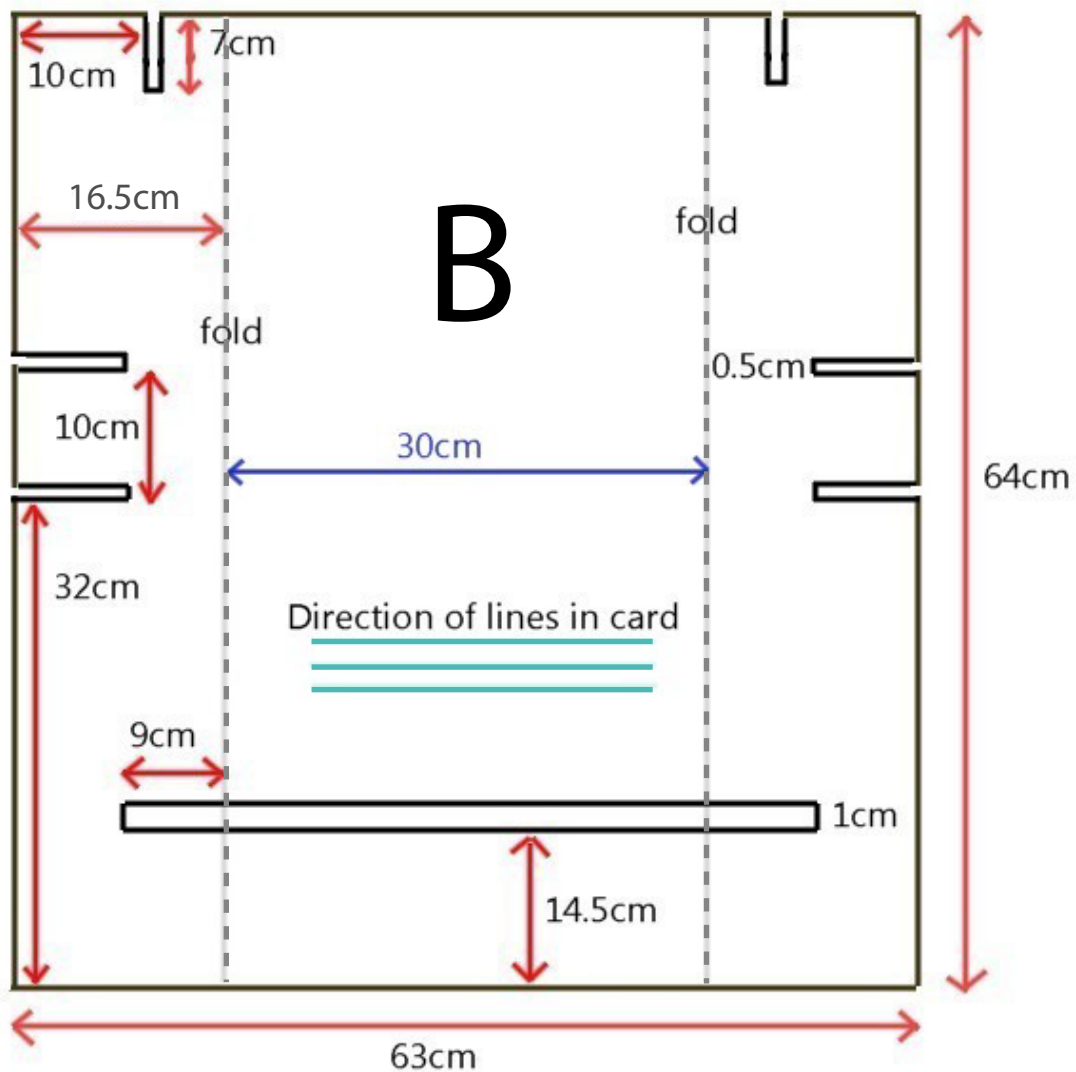

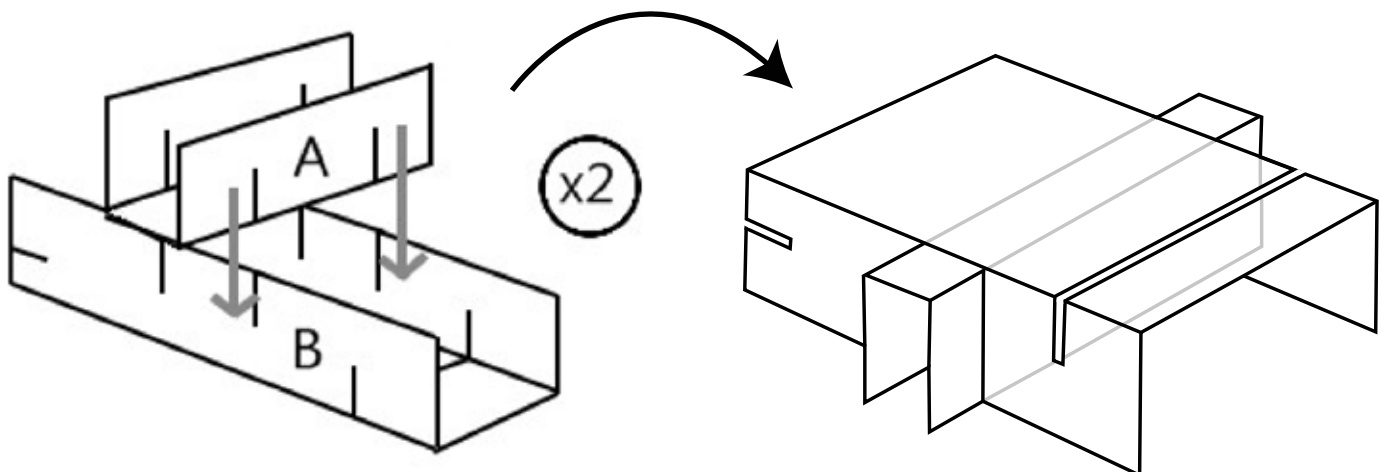

Component A

Base - Supports (4 needed)

11cm

17cm

9cm

30cm
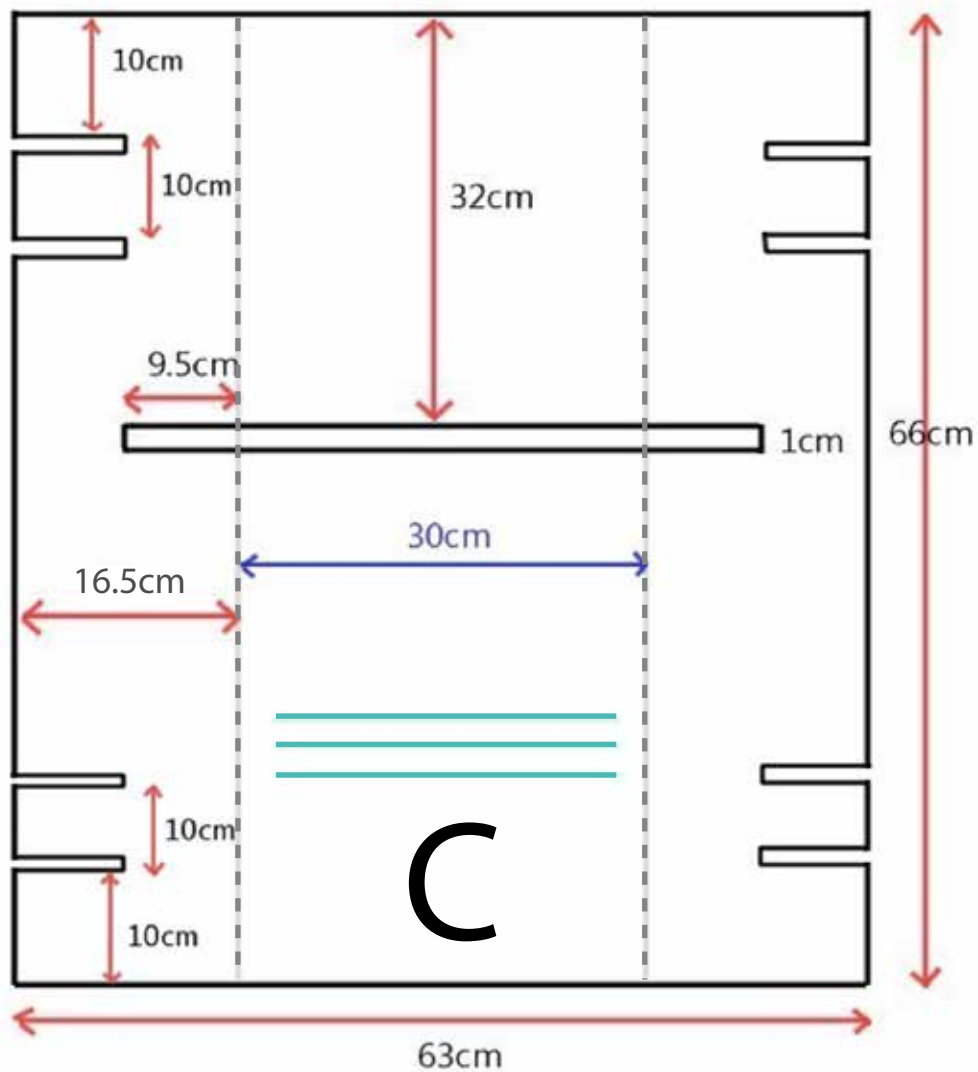

50cm

A

45cm
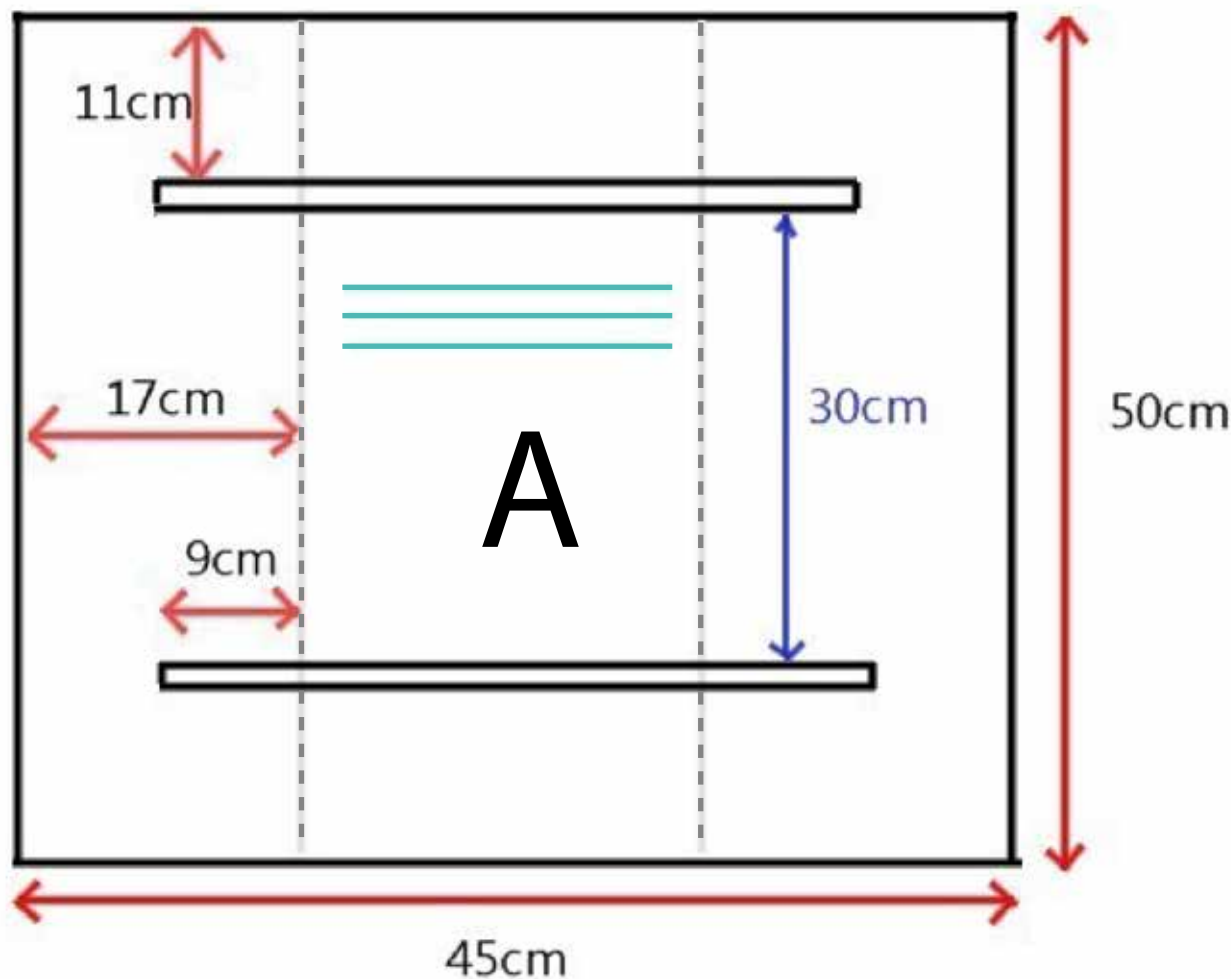

Component B

Base - Ends (2 needed)

Fitting A and B together - Ends and Supports

Fold both pieces over and slot the end
piece over the support, perpendicular to it.
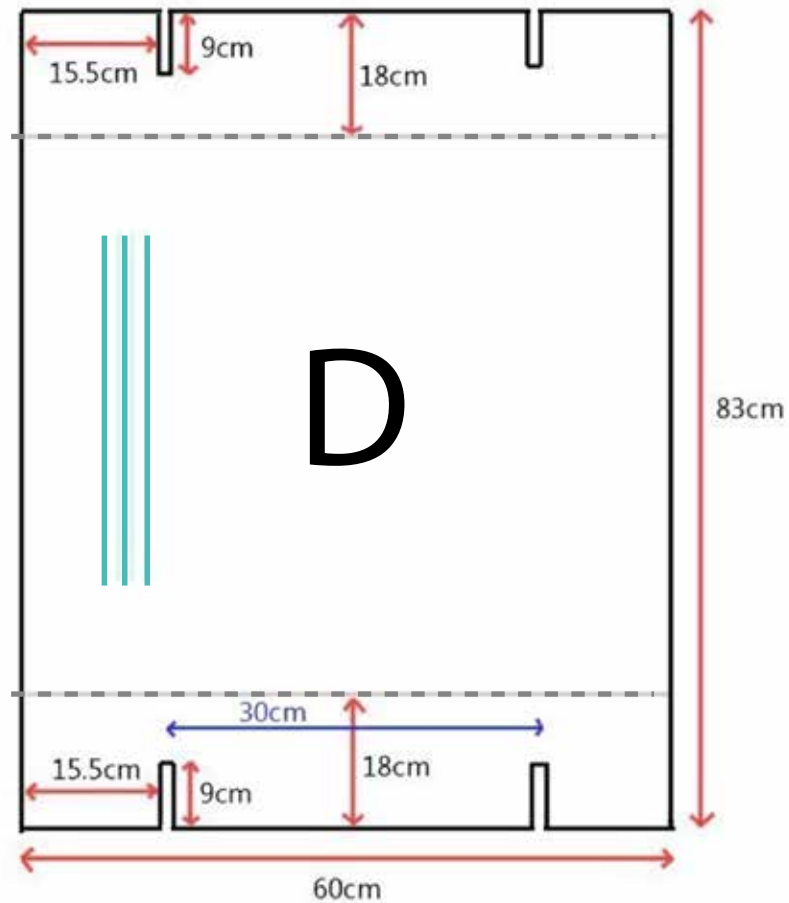

Component C

Base - Middle

Fitting A and C together - Middle and Supports

Fold both pieces over and slot the middle piece over the two supports, perpendicular to it.
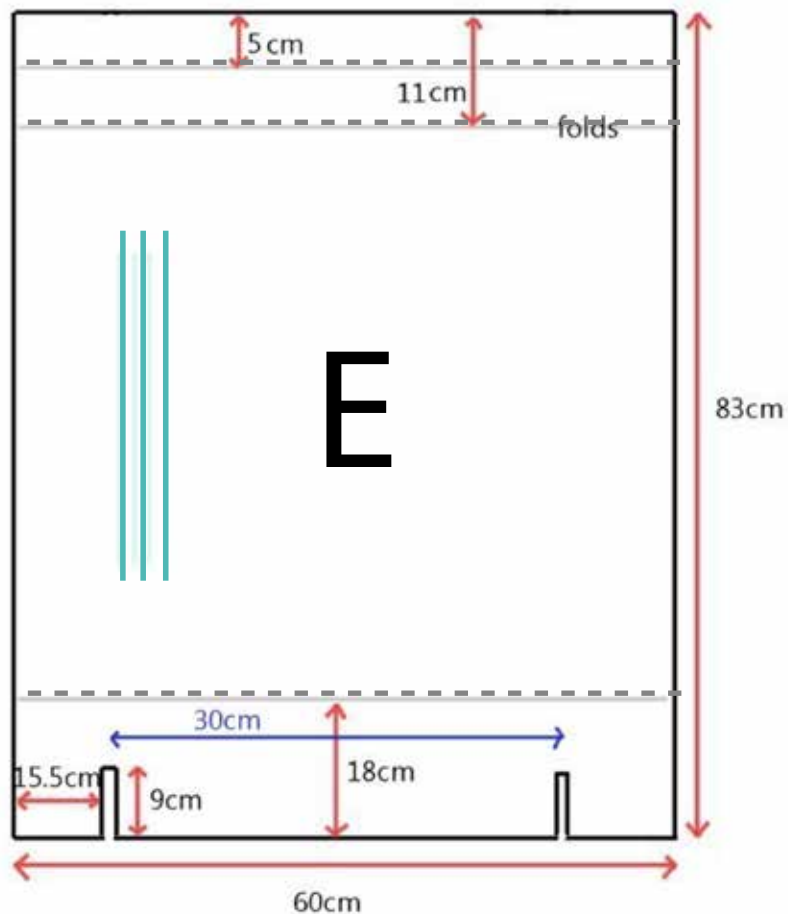

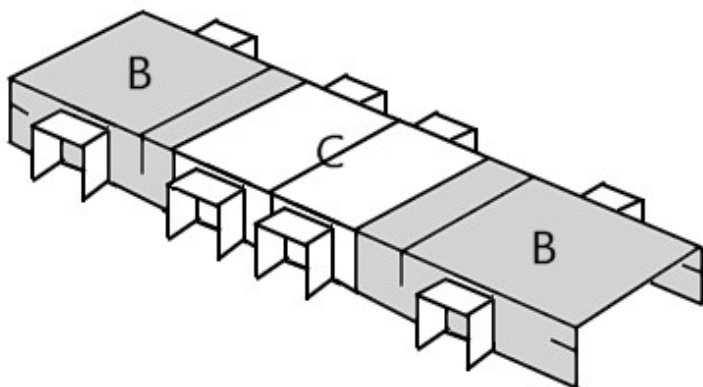

Component D

Top - Middle Layers (2 needed)

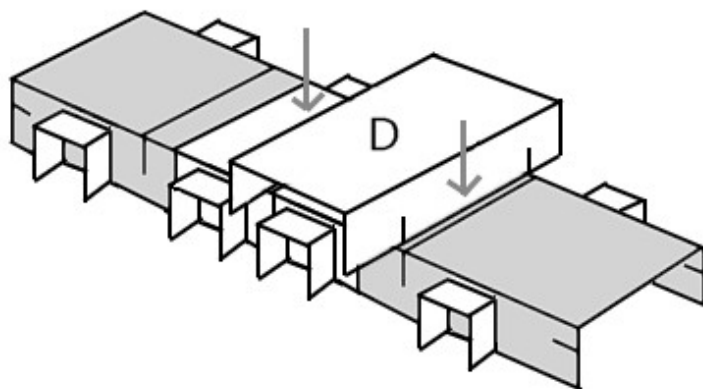

# Component E

Top - End Layers (2 needed)

Assembly

1. Align together the base ends and middle (as shown below)

**2.** Fold and then slot in the top layer - D onto the base

3. Repeat step 2 - for the second component D

4. Fold and fix the top layer - E. Repeat for the second component E for the other end.

Congratualtions - your bed is now ready for use.
