

# Assembly Instructions

## Headboards

3 mins  
Assembly

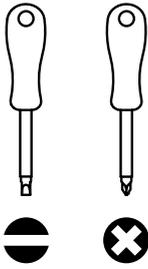

### Important before assembly:

Check the contents of the product before attempting to assemble this product.

It would be sensible to lay a rug or a carpet on the floor where you intend to assemble the product, to avoid scratches and damaging the product.

### Health & Safety:

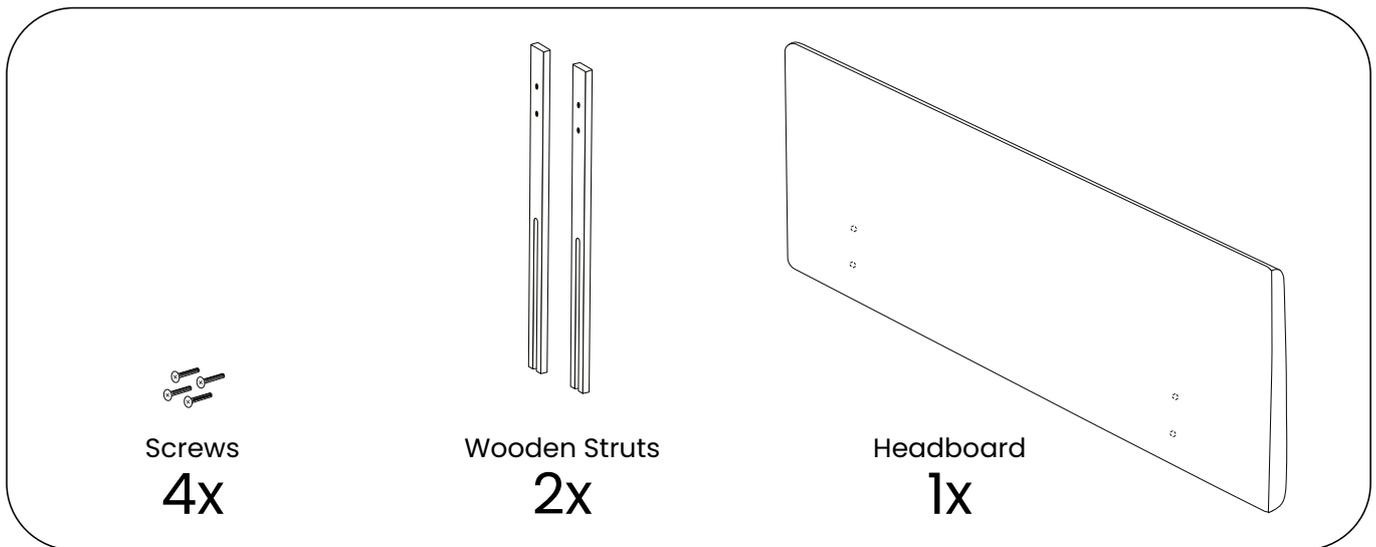

Please keep small parts out of reach of children.  
DO NOT use this product unless all fixings are secured.

These tools are not necessary, but may help to assemble the product.

Do NOT use any power tools as this may cause damage.

### Parts & Fittings Check List

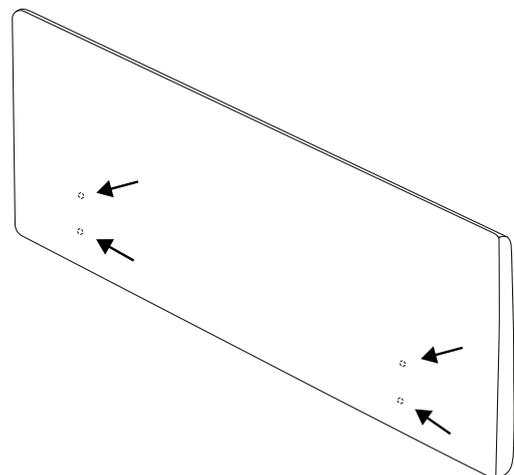

Screws  
4x

Wooden Struts  
2x

Headboard  
1x

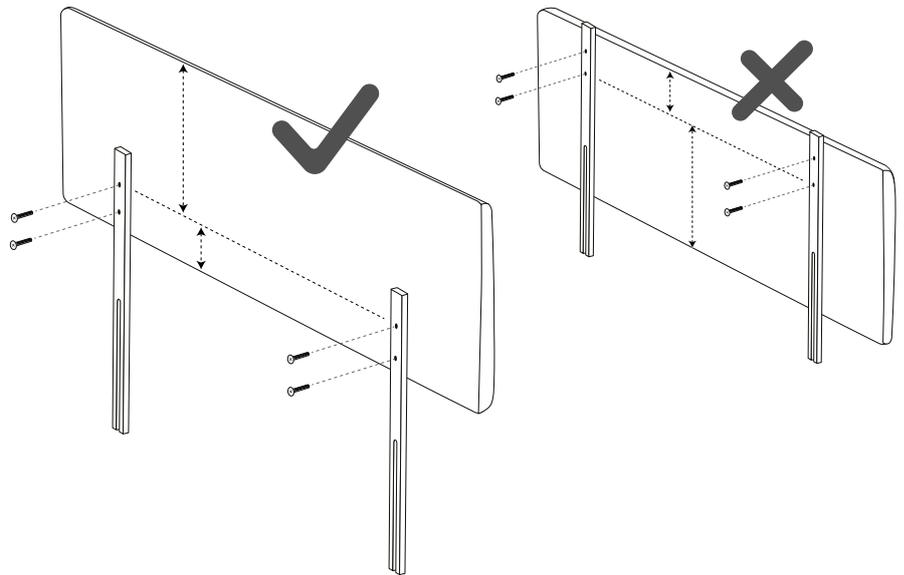

### Instructions

1. There are four stapled areas at the back of the headboard. In between each stapled area, you will feel a hole for the screws, to be used to fasten the struts.

**2.** Align the struts and the holes correctly on the bottom-half of the headboard.

With the four screws supplied, fasten the struts in position.

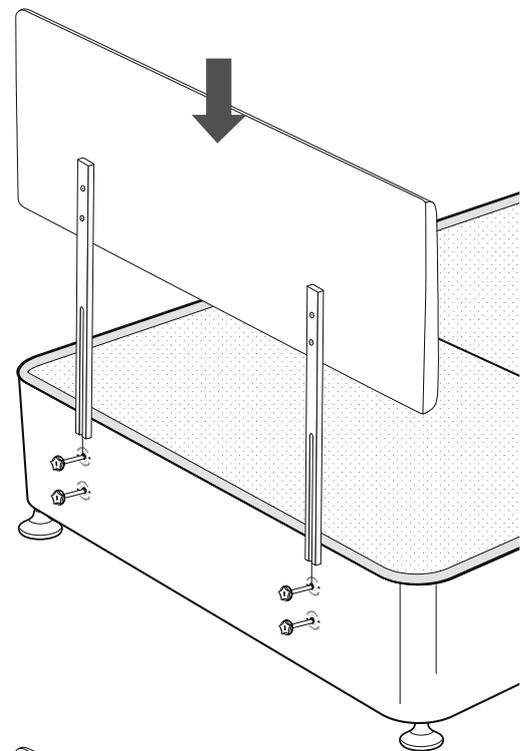

*The headboard is now ready to fasten to the bed base.*

## Fitting onto a base

**3.** If fitting onto a divan bed base, locate the headboard holes at the end of the base.

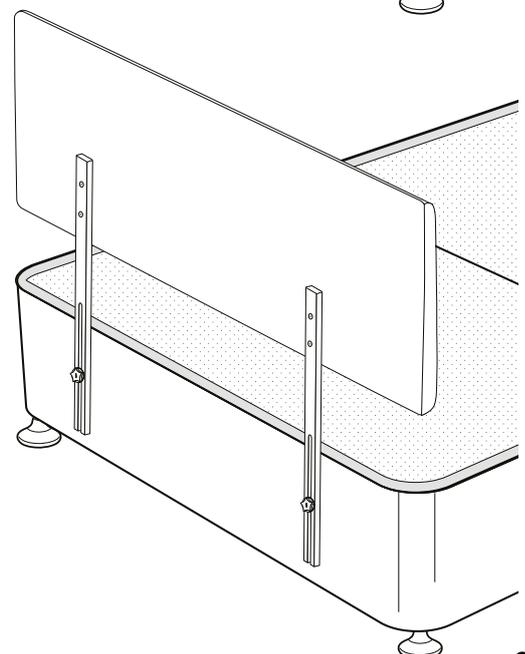

**4.** With the bolt screws (*provided with the bed-base and not the headboard*), press the bolt screws into the base holes until meeting resistance.

Proceed to screw the bolt screws clockwise, leaving enough space for the headboard struts to fit into place.

**5.** Once the headboard is at the desired height, tighten the bolt screws until the headboard is locked in place.

*(Please note: 5ft King Size and 6ft King Size bases usually come with 4 bolt screws, whereas the other smaller sizes will come with only 2 bolt screws)*
