Important for Ottoman and other gas lift beds

Note:

The bed base is in the upright position when first assembled as the gas lifts are fully extended during shipment for safety. After assembly a firm downward push will be required to overcome any resistance in the gas lifts as these may initially stick. We suggest placing a mattress on top of the bed base to aid this and also test the operation of your new lift up bed by lifting and pushing down the bed base a few times to allow the lifting mechanism to bed in.

The lift mechanism provides assistance with the lift of the mattress fitted to the base. It does not lift the mattress for you. The system has been designed to effectively lift the base system fitted with a variety of mattress weights and combinations of depths. Depending on the combination of the mattress weight and depth determines the degree of assistance provided by the mechanism.

Following the installation of the mechanism lift, pull the base up and down a few times to free off the system. The gas cylinders fitted to the system may be stiff when first used or if the system has not been operated for a period of time.

Use the strap handles to lift up the mattress base using two hands. Pull the mattress base down using two hands equally spaced from the centre of the mattress base. DO NOT pull down on one side of the base only as this is likely to damage the base system with potential failure of the mattress base system and lift mechanism.

Do NOT operate the lift up mechanism without the mattress placed on the base.

Caution:

Do NOT allow children to operate the lift mechanism.
Do NOT allow children near the lift base when operating the mechanism.
Do NOT allow children in the area of the internal storage base.
Keep hands clear of the mechanism when operating the base system.
Do NOT stand inside the bed or the internal storage base.
Do NOT overload the internal storage base.

KINGSTON Ottoman Bed - Double

Assembly Instructions

Before you begin...

1. Please check you have received the correct product.
2. Unpack all boxes and lay out each component on the floor.
3. Check your product for any damage that may be immediately obvious. If damage is identified, please contact your retailer.
4. Please read through these instructions thoroughly to ensure you have constructed your bed correctly.

For Care and Maintenance of your bed...

- Always assemble in your desired room of use.
- Always check all screws and fixings periodically to ensure they are still secure.
- Do not push or pull this bed as it will cause damage.
- Always lift this bed with a second person to prevent damage or injury.
- Keep any sharp objects away from this bed Frame.

For your Health and Safety...

- Please don't not jump on this Bed.
- Do not use this bed if you find missing, damaged or worn parts. Please contact your retailer.
- Please do not use this bed until you have fully secured all fixings.
- Please keep all small components away from children.
- Please ensure this bed is on an even, level surface.

Also...

If your desired room of choice has a non-carpeted surface please ensure that you use some form of anti-slip protection and do not place directly on the wooden floor. This will prevent the bed from moving and therefore collapsing which will void your guarantee..

Important for Ottoman and other gas lift beds

Please follow these final steps to ensure the best experience with your new bed

- Please ensure the pistons are fitted to the bed frame.
- Please place the mattress on top of the bed frame.
- Standing at the foot of the frame (looking at the headboard) open the base and the press quite forcefully down on the mattress - please do not attempt to do this without the mattress being in place.
- Please do not pull on the strap handles.
- Please note as the pistons are full of gas - you will need to press heavily to release the compressed gas.
- Once done the pistons should start operating as normal.

Please dispose of all packaging safely.

General Care & Maintenance

Wipe clean with a slightly damp cloth.
Avoid the use of all household cleaners and abrasives.

Periodically check all screw & fixings to ensure they are secure.

When moving your product, carefully lift into place. Never drag or push the product across the floor as this will cause damage to the joints. If the product is used on hard flooring, such as wood or laminated floor, you must place some protection under the legs to stop the product from moving. If this is not adhered to, it could result in failure to the product that will invalidate the warranty.
